

DON'T MISS THE

BOAT!

Our
63rd
Year

Whale Watching

*Join Captain John Boats for a "Whale of a Time"
Or our highly popular.....*

Floating Classroom Program

- A hands-on oceanographic program for students of all ages
- Select station activities to address specific curriculum needs
- Stations meet state frameworks and national science standards
- Includes an informative narration of historic Plymouth Harbor
- 2-hour and 4-hour programs now available

For over 50 years, Capt. John Boats has been dedicated to directly sharing with and teaching other's about the marine environment. Whether you are an educator, looking to implement a "hands-on" marine biology excursion, want to provide your class with an exciting school field trip, or simply curious about marine wildlife in their natural habitat, you will find our floating classroom program and/or whale watch, guaranteed to be an educational and fun-filled experience you will never forget!

You will learn about Cape Cod Bay and the Stellwagen Bank National Marine Sanctuary, the feeding grounds that attract large baleen whales, toothed whales, seabirds, and large pelagic fish. Your naturalist, an experienced marine biologist, will provide a unique, interpretive commentary throughout your voyage. Become immersed in examining whale artifacts, including baleen, sperm whale teeth, and whale prey items, such as the American sandlance and copepods.

New this year!

Our chartered student trips will include:

- ❖ plankton tow and onboard observation
- ❖ research involvement including data collection by student teams
- ❖ navigation station in the wheelhouse with the Captain (weather permitting)

Reserve your excursion now for our 2009 season.... to receive the date and time you need.
